

ITC Ltd.

Historical Financial Statements, Ratio Analysis & Power BI Dashboard

Project: Historical FS — ITC | 10-year history + LTM + FY27–FY31 forecast + Power BI dashboard

1. Purpose

This report covers a full project built around ITC Ltd., one of India's largest diversified conglomerates (FMCG, hotels, paperboards, agri-business, and IT). The project has two parts: a 10-year historical financial model built in Excel, and a one-page Power BI dashboard built on top of that same data. This report walks through both — the numbers and trends from the Excel model first, then how the dashboard was put together.

As with the underlying workbook, all figures are in ₹ Crore unless otherwise noted (per-share figures in ₹). The reporting period runs FY2017 (year ended 31 March 2017) through FY2026, plus a trailing-twelve-month (LTM) column and the ten most recent quarters.

2. What's in the Excel Model

- Historical FS — full Income Statement, Balance Sheet, and Cash Flow Statement for FY2017–FY2026 and LTM, with a built-in balance-sheet check (confirmed TRUE for every year — Assets = Liabilities + Equity).
- Common Size Statement — every income statement line as a % of Sales, every balance sheet line as a % of Total Assets, for quick year-on-year cost-structure comparison.
- Ratio Analysis — growth rates, margins, returns (ROE, ROCE), working-capital turnover and days, and cash-flow coverage ratios, each with a 10-year mean and median.
- Forecasting — Sales, EBITDA, and EPS projected FY2027–FY2031 using Excel's FORECAST() function — a straight-line trend fit to the 10 years of historical data, not a bottom-up business forecast.
- Data Sheet — the raw source data (annual and quarterly P&L, balance sheet, cash flow, share price) that every other tab pulls from. Marked "please do not make any changes" in the original file — this is the single source of truth.

3. Income Statement Trend

Revenue, profitability, and per-share earnings all grew steadily over the decade, with a dip in FY2021 (COVID-affected year) and a strong rebound in FY2022–FY2023:

Metric	FY17	FY20	FY23	FY26	10-yr CAGR
Sales	42,768	49,388	70,919	78,868	~7.0%
EBITDA	15,470	19,344	25,704	27,306	~6.5%
EBIT	14,317	17,699	23,895	25,595	~6.6%
Net Profit	8,719	13,175	17,379	18,495	~8.7%
EPS (₹)	7.18	10.72	13.98	14.76	~8.4%

Sales grew from ₹42,768 Cr in FY17 to ₹78,868 Cr in FY26 — roughly a 7% compound annual growth rate. Net Profit grew faster, at roughly 8.7% CAGR, reflecting some margin expansion and operating leverage over the period. EPS nearly doubled, aided modestly by a small increase in share count (from ~1,215 Cr to ~1,253 Cr shares over the decade).

4. Margin Trend

Margins have been broadly stable, with EBITDA margin oscillating in a 34%–39% band and net margin in a 20%–27% band across the decade:

Margin	FY17	FY20	FY23	FY26	10-yr Mean
Gross Margin	48.7%	50.7%	46.0%	45.7%	47.2%
EBITDA Margin	36.2%	39.2%	36.2%	34.6%	36.3%
EBIT Margin	33.5%	35.8%	33.7%	32.5%	33.6%
Net Profit Margin	20.4%	26.7%	24.5%	23.5%	23.2%

Gross and EBITDA margins peaked around FY2020 and have eased modestly since, consistent with rising raw material costs (raw material cost as a % of sales rose from ~36% in FY17 to ~44–45% in FY25–26 per the common-size statement).

5. Balance Sheet & Returns

ITC's balance sheet is notably conservative — the company carries almost no debt, and what borrowings exist are small relative to its asset base:

Metric	FY17	FY20	FY23	FY26
Total Assets (₹ Cr)	55,898	77,311	85,831	93,637
Borrowings (₹ Cr)	45.7	277.5	306.0	2,399.1
Cash & Bank (₹ Cr)	2,967	7,277	4,880	3,009
Return on Equity	18.8%	20.2%	25.1%	25.5%
Return on Capital Employed	30.8%	27.0%	34.4%	34.4%
Interest Coverage	292x	217x	307x	301x

Interest coverage has stayed above 200x throughout the decade — interest expense is a rounding error next to EBIT. Return on Equity improved from ~19% to ~25–26% over the period, and Return on Capital Employed has generally trended up, both pointing to efficient, high-return capital use even as the balance sheet has grown. Borrowings did jump from ₹303 Cr (FY25) to ₹2,399 Cr (FY26) — still trivial relative to Total Assets (~2.6%), but worth watching if the trend continues.

6. Working Capital & Cash Flow

- Cash Conversion Cycle has ranged roughly 43–90 days across the decade, with FY2026 at the high end (~90 days) — driven mainly by rising Inventory Days (from ~135 days in FY17 to ~159 days in FY26).
- Cash from Operating Activities has grown from ₹10,627 Cr (FY17) to ₹18,464 Cr (FY26), consistently the primary source of cash.
- Cash from Financing Activities has been consistently negative (₹(16,147) Cr in FY26) — almost entirely dividend payouts, consistent with ITC's high dividend payout ratio (mostly 95–125% of earnings across the period).

7. Forecast (FY2027–FY2031)

The Forecasting tab projects Sales, EBITDA, and EPS forward using a straight-line trend (Excel's FORECAST() function) fitted to the 10 years of historical actuals — not a bottom-up, assumption-driven forecast. It's best read as "what a straight-line continuation of the last decade's trend looks like," not a business plan:

Metric	FY26 (Actual)	FY27F	FY29F	FY31F
Sales (₹ Cr)	78,868	82,755	91,506	100,257
EBITDA (₹ Cr)	27,306	36,299	40,492	44,685
EPS (₹)	14.76	16.04	17.86	19.67

On this basis, Sales are projected to reach roughly ₹100,257 Cr and EPS roughly ₹19.67 by FY2031.

8. A Data Note Worth Flagging

The model carries two different "Net Profit" figures for FY2025 that don't match, and it's worth understanding why before using either in isolation:

- The Historical FS tab shows FY2025 Net Profit of ₹17,250 Cr (net margin 22.9%) — in line with the surrounding years.
- The Data Sheet / Common Size tabs show FY2025 Net Profit of ₹34,747 Cr (common-size net margin spikes to 46.1%), driven by an Other Income line of ₹17,803 Cr that year — many multiples of the ₹2,000–3,300 Cr Other Income seen in every other year.

This gap is almost certainly a one-off gain flowing through Other Income in FY2025 (ITC completed the demerger of its Hotels business around this time, which is a plausible source, though this hasn't been independently verified against ITC's FY2025 annual report). Whichever figure is used downstream, it should be used consistently.

9. The Power BI Dashboard

On top of the Excel model, the same numbers were built into a one-page Power BI dashboard — meant to be read in a few seconds rather than studied line by line.

- Five KPI cards at the top show the headline numbers for whichever year is selected: Sales, EBITDA, Net Profit, EPS, and Return on Equity.
- A trend chart shows Sales, EBITDA, and Net Profit together, so it's easy to see how much of revenue growth actually reaches the bottom line.
- A second trend chart shows margins and returns (EBITDA margin, net margin, ROE, ROCE) side by side, to check whether growth is coming with or without a drop in profitability.
- A column chart compares Total Assets against Borrowings by year, which makes ITC's near-zero-debt balance sheet obvious at a glance.
- A year slicer at the top filters the whole page down to a single year at a time.

To make this work in Power BI, the underlying data first had to be reshaped — years that sat across columns in the Excel model (one column per year) were rearranged into rows instead, with a separate small table just for the years (used to filter everything else) and separate tables for the income statement, balance sheet, cash flow, and ratios. This is the standard way data is organised for Power BI, and it's what lets one chart or card work correctly no matter which year is selected.

The actual numbers on the cards and charts (Sales, EBITDA, margins, ROE, year-on-year growth, and so on) are calculated using Power BI's formula language, DAX — each one is a small, named calculation that pulls the right figure for whichever year is currently selected, rather than a fixed number typed in. This means the dashboard updates instantly when a different year is picked in the slicer, and the same measures can be reused across every card and chart.

The finished dashboard — ITC Ltd. Financial Performance, FY2017–FY2026.

10. Files in This Project

- ITC_Historical_Financial_Statements.xlsx — the live, formula-driven Excel model (5 tabs: Historical FS, Common Size Statement, Ratio Analysis, Forecasting, Data Sheet).
- ITC_PowerBI_DataModel.xlsx — the same data, reshaped into the tables the Power BI dashboard is built from.
- ITC_Dashboard.pbix — the Power BI dashboard file.
- README.md — repo overview and instructions for using both the model and the dashboard.
- This report (Report.docx) — narrative summary of the numbers, trends, the FY2025 data caveat, and how the dashboard was built.
